

Job Costing Allows you to track actual costs and compare them to your estimated costs on a job by job basis. Quotes may be entered, printed and tracked from Manufacturing Job Costing using existing and non-existing items and labor resources. This information may be used as your estimated cost. You may also opt to use existing items and bills of material in other modules to generate your initial quotes and estimated costs. This package interfaces with Inventory Management and optionally with Product Definition, Customer Order Processing, Product Purchasing, Shop Floor Control, PBS Accounts Payable, Accounts Receivable, and Payroll. Some of it's many features include:

- Job quotation and cost estimate building.
- Optional use of Bills of Material and Routings.
- Entry of job orders with final cost estimate.
- Processing of actual job quantities and costs.
- Production and labor reporting.
- Open job summary reports and displays allow you to monitor job costs in real time.
- Summary and detailed closing reports provide you with a wealth of information on each cost aspect of a job.
- Closed job summary reports and displays allow you to review costs related to past jobs.

Item #	Description	Whse	Type	Purch/Mfd	Inv-UM	Pch-UM	Vendor

PBS Manufacturing is a powerful, easy to use business management system designed to meet the needs of today's small to mid-size manufacturing company. It provides the tools needed to reduce inventory, streamline production, improve on-time deliveries, manage product costs, improve customer service levels and much more. When coupled with the Passport Business Solutions accounting modules it is a complete business management solution.

PBS Manufacturing is flexible enough to meet the needs of most small to mid-size manufacturing environments. The modular design and many configurable options will allow you to

tailor a system to meet your individual needs. Invest only in the technology you need today and add to your system as your needs change. Whether you make to order, make to stock, or run a job shop, you will find tools that can help you streamline your operations.

There are more than 130 reports and on-line displays placing information at your fingertips. If you can't find the exact report you need, add AcuXDBC® and your favorite ODBC-compliant reporting tools for developing custom reports, and the sky is the limit. PBS Manufacturing will provide you with more information and more control over your manufacturing operation.
