

Options and Interfaces

PBS Financials

PBS Manufacturing may be integrated with PBS financials. This integration minimizes duplicate data and maximizes your investment by helping you gain control of your entire business.

AcuXDBC®

One of the most common forms of customization requests is for special reports. Everyone has a way they wish to see their information that's often unique to the individual company. AcuXDBC is an optional, add-on product that will allow you to have direct, read-only access to your data files. What's this mean to you? You can use tools like Microsoft Access®, Excel®, Crystal Reports and any other ODBC-compliant application to view and display your information. Write custom reports, add external applications unique for your company, integrate with your UPS shipping system, and much more. The time this product can save you, as well as the deeper access to vital data makes this a worthwhile addition to any installation.

Lot/Serial Number Control

PBS offers options for assigning and tracking of lot/serial numbers for selected items. A detailed history of transactions is maintained for easy tracking of controlled items.

EDI

PBS is now providing EDI solutions for manufacturers. Customer orders can be received, and acknowledged using the EDI interface. This option will drastically increase the efficiency of your order entry process. Other areas of EDI are currently under development.

Bar Code Capability

PBS allows the printing of bar coded documents. Bar code scanning can improve the accuracy and efficiency of transaction reporting.

PBS Manufacturing is a powerful, easy to use business management system designed to meet the needs of today's small to mid-size manufacturing company. It provides the tools needed to reduce inventory, streamline production, improve on-time deliveries, manage product costs, improve customer service levels and much more. When coupled with the Passport Business Solutions accounting modules it is a complete business management solution.

PBS Manufacturing is flexible enough to meet the needs of most small to mid-size manufacturing environments. The modular design and many configurable options will allow you to

tailor a system to meet your individual needs. Invest only in the technology you need today and add to your system as your needs change. Whether you make to order, make to stock, or run a job shop, you will find tools that can help you streamline your operations.

There are more than 130 reports and on-line displays placing information at your fingertips. If you can't find the exact report you need, add AcuXDBC® and your favorite ODBC-compliant reporting tools for developing custom reports, and the sky is the limit. PBS Manufacturing will provide you with more information and more control over your manufacturing operation.
